

Jason Bogle

Summary

I am searching for a position where I will utilize the skills and knowledge I have obtained through my bachelor's degree in computer science. I have experience working with several languages and have learned concepts that are useful for programming in any language. Throughout my life I have been faced with challenges. These challenges have only served to strengthen my resolve and problem solving skills, which will be useful in any computer science position.

The best way to contact me is through email at jason@jasonlbogle.com.

Objectives

I intend to continue to develop my skills as a computer scientist through developing software that is of the highest quality. In applying for this position, I hope that this goal can be achieved while working for your company. This would allow me improve at a faster rate and help you bring in high profile clients and enter new markets.

Education

Middle Tennessee State University

Middle Tennessee State University, Murfreesboro, Tennessee

Graduated: May 2013

Grade: 3.769

Through my four years at MTSU, which uses C++ as the main language for teaching, I made the dean's list in each of my last six semesters. I was awarded scholarships from the Computer Science Department each of my last three years. As a senior, I was inducted into the Upsilon Pi Epsilon organization. Some of the classes I took and excelled in include:

Python

Parallel Processing

Artificial Intelligence

Theory of Programming Languages

Software Engineering

These classes, as well as the other classes not listed, have prepared for a job in the computer software field.

Degree Completed: Bachelor of Science

Program: Computer Science - Professional
